

Cashtie Integration Types Comparison

Non-Tech

The Non-Tech program is the fastest way to start accepting cash payments without any technical integration.

Mid-Tech

The Mid-Tech program provides flexible rule based payment authorization and access to the Cashtie API. Barcodes can be embedded into any medium (statement, mobile, web).

High-Tech

Our High-Tech program provides complete control with real-time authorization of each transaction via our Processor Integration, using the Cashtie Processor API.
